## ZUCCHETTI. QUALITÀ ED ECOSOSTENIBILITÀ HIGH QUALITY AND GREEN PRODUCTS

Le collezioni Zucchetti nascono per resistere nel tempo e gli articoli vengono severamente testati internamente e da laboratori di prova esterni, che ne garantiscono affidabilità e durata.

La qualità del prodotto è l'obiettivo primario sia delle attività di progettazione, che di ogni fase del ciclo produttivo.

L'attenzione per l'ambiente e per l'elemento acqua è da sempre un aspetto prioritario nelle politiche e nella gestione aziendale.

La rubinetteria o i sistemi doccia adottano dispositivi e soluzioni ad hoc che consentono di avere sempre una portata limitata, con un notevole risparmio di acqua ed energia, senza nulla togliere al comfort di utilizzo.

Negli impianti produttivi, dove vengono utilizzati considerevoli quantità di acqua, il controllo, la depurazione ed il riciclo sono politiche consolidate, a sostegno di una produzione ecosostenibile, nel rispetto del territorio.

Zucchetti è inoltre una azienda "Zero Emission Electricity" avendo messo in atto azioni di azzeramento della produzione di CO<sub>2</sub> derivante dal consumo di energia elettrica, grazie all'utilizzo di energia verde certificata, in conformità con la normativa ISO EN 14064.

Consapevoli della sempre maggiore importanza della certificazione LEED (Leadership in Energy and Environmental Design), ossia del sistema di valutazione per la sostenibilità degli edifici, l'ufficio tecnico Zucchetti è a disposizione per dare supporto a chi costruisce e fornire consulenza ed informazioni atte a certificare che i prodotti Zucchetti installati, siano allineati con gli standard richiesti per l'ottenimento di tale certificazione nell'edificio in esame.

La stretta collaborazione tra azienda, progettisti ed installatori è una pratica consolidata che rientra nelle politiche di qualità dei servizi offerti.

Quality has always been the keyword for our company's mission.

Zucchetti collections are designed to resist in time and our products are rigorously tested in house and by external control laboratories, which guarantee their reliability and duration.

Product quality is the primary objective during both our design phase and every stage throughout the production cycle.

Respect for the environment and the element of water has always been a very important aspect for our company's politics and management.

Our mixers and shower systems adopt ad hoc devices and solutions that ensure reduced water flow, giving considerable savings in terms of water and energy consumption, without any reduction in user comfort.

In our production units large amounts of water are used. Constant controls, water filtering and recycling are consolidated procedures that support eco-sustainable production with respect for our environment.

Moreover, Zucchetti is qualified as "Zero Emission Electricity" company, because we implemented reduction actions for CO<sub>2</sub> emission deriving from electricity consumption, thanks to the use of certified green energy, in accordance with ISO EN 14064 standard.

Aware of the ever-increasing importance of LEED (Leadership in Energy and Environmental Design) certification, namely the system for assessing the sustainability of buildings, the Zucchetti Technical Department is available to support builder and contractors. We can provide advice and information to attest that the installed Zucchetti products are in accordance with the standards required by the building, to obtain this certification.

The close collaboration between company, architects, engineers and installers is a consolidated practice that is part of the quality policies for the offered services.

## ZUCCHETTI. FOCUS DOCCIA SHOWER FOCUS

Zucchetti offre molteplici proposte per la personalizzazione dello spazio doccia, soluzioni tecniche in grado di rispondere ad ogni esigenza progettuale, scegliendo liberamente la collezione che meglio si addice allo stile del proprio bagno.

I miscelatori termostatici consentono di impostare la temperatura dell'acqua alla gradazione desiderata, di raggiungerla in tempi brevissimi e di mantenerla costante durante tutto il periodo di utilizzo, anche se si verificano variazioni di pressione o temperatura.

La valvola termostatica interna miscela continuamente acqua calda e fredda in modo da mantenere la temperatura in uscita costante, alla gradazione preimpostata.

Un dispositivo di sicurezza assicura che la temperatura dell'acqua miscelata non superi inavvertitamente i 38°C, temperature superiori sono raggiungibili solo mediante pressione di un tasto di sicurezza.

E' una rubinetteria comoda, sicura, affidabile e vantaggiosa sotto il profilo del risparmio, sia idrico che energetico.

Zucchetti offers a wide range of solutions for the personalization of the shower area, technical solutions that meet any design needs, freely choosing the collection that best suits your own bathroom style.

Thermostatic mixers allow to set the water temperature to the desired gradient, to reach it in a very short time and to keep it constant throughout the period of use, even if pressure or temperature changes occur.

The inner thermostatic valve mixes hot and cold water, to maintain the constant output temperature at the preset scale.

A safety device ensures that the mixed water temperature does not inadvertently exceed 38° C, higher temperatures can be reached only by pressing a safety button.

It is a comfortable, safe, reliable and cost-effective mixer, in terms of both water and energy saving.

La nuova gamma di miscelatori termostatici con rubinetti di arresto incastellati è disponibile per tutte le serie del catalogo WW Zucchetti, tranne Sun e Wind. Il miscelatore termostatico con da 1 a 4 rubinetti di arresto consente la progettazione di impianti doccia con più uscite, utilizzabili anche contemporaneamente, abbinando ad esempio soffione a pioggia con body jets, oppure soffioni multifunzione con più getti che possono essere sommati.

Ad una pressione dell'acqua minima di 3 bar, i sistemi doccia realizzati abbinando questa tipologia di miscelatori termostatici con soffioni, soffioncini laterali, doccette e bocche della gamma Zucchetti, garantiscono sempre un getto ottimale anche quando tutte le uscite acqua sono aperte contemporaneamente. I termostatici con rubinetti di arresto incastellati hanno una parte incasso unica per tutte le collezioni realizzata in ottone Ecodr, compatibile con le normative mondiali. Possono essere installati sia in verticale che in orizzontale e la struttura della parte incasso è stata pensata in modo tale da ottimizzare le distanze tra i singoli elementi, è compatta e di facile manutenzione grazie a cartuccia e filtri ispezionabili.
